

China Riveters.	Melting Pot and Crucible makers.
China and Porcelain Door Furniture makers.	Muffle manufacturers.
China and Porcelain manufacturers.	Parian manufacturers.
China drillers.	Plumbers' Pottery makers.
China Figure manufacturers.	Porcelain Letter makers.
China Ornament makers.	Porcelain manufacturers.
China painters and gilders.	Potters.
China Toy makers.	Potters' engravers.
Drain Pipe and Tile makers.	Rockingham Ware manufacturers.
Earthenware Figure manufacturers.	Stone Bottle makers.
Earthenware manufacturers.	Stone Mortar and Pestle manufacturers.
Egyptian Black-ware manufacturers.	Stone potters.
Encaustic Tile makers.	Stoneware manufacturers.
Fancy Jug manufacturers.	Terra-Cotta makers.
Fire Brick makers.	Tobacco Pipe makers.
Jug manufacturers.	Vase manufacturers.

To these may be added the following occupations sustained in Great Britain by an active ceramic industry :—

Brick and Tile Machine makers.	Ash merchants.
Brick Makers' Implement manufacturers.	Chert Stone dealers.
Brick Mould makers.	China Clay merchants.
Grinding Mill makers.	Clay merchants.
Kiln builders.	Flint millers.
Machinists in general.	Manganese merchants.
Pug Mill makers.	Marble Clay merchants.
Potters' Wheel makers.	Pipe Clay manufacturers.
	Zaffres refiners.

CLASSIFICATION OF POTTERY.

The word *pottery* in its widest sense, and as used in this Report, is a very comprehensive term, including all fictile productions of which clay is the chief material. This wide range of products may be grouped under two grand divisions—the *Earthy* and the *Vitreous*. Of the first, ordinary earthenware and faience are examples; and of the second, porcelain or china. The chief characteristics of the earthy division are, as the name indicates, an earthy substance, porosity, infusibility, opacity and comparative softness; of the vitreous, a vitreous substance, fusibility, translucency and comparative hardness.
