

GENERAL REMARKS.

Shape of Seats. Under each design, we indicate the shape of the Seats which can be supplied to the various patterns, by the following signs:

round ○ — oval □ — square □ — heart-shaped ◊ — stirrup shaped ◊

Veneer Seats (waterproof). Nearly all Chairs, Armchairs and Settees illustrated in this Catalogue with Cane Seats can, if required, be supplied with wooden Seats of various patterns (see illustrations on page 12, 13) and vice-versa. When ordering please state clearly the kind of Seat wanted, if Wood Seat, also the design required. **All wooden Seats and Backs are waterproof and are not affected or damaged by moisture.**

Colour. All our goods are made of Beech-wood and can be supplied in the following colours:

- a) without extra charge: walnut, mahogany or black (ebonised);
- b) with extra charge (see price list): natural or fancy colours, oak polished bright or finished dull imitation antique.

Braces (see illustration below Fig. 1). Side Braces are indicated by the sign ◁ and can be fitted to nearly all Chairs for extra cost (see price list). Where Chairs are illustrated with Side Braces, the cost of same is included in the printed price.

Iron Braces (see illustration below Fig. 2), are fitted under the Seat Frames and can be supplied for any Chairs; for extra cost see price list.

Strengthening Supports can be supplied as follows (for extra cost see price list):

- a) **4 Bows** (see illustration below Fig. 3) indicated by the sign ≡. Chairs fitted in this manner instead of the ring acquire additional strength, and the underpart cannot be used as a footrest.
- b) **Patent Support** (see illustration below Fig. 4), indicated by a sign ∩ is another method used instead of a ring and is very effective.
- c) **Long Bow Supports** (see illustration below Fig. 5). This is another method which can be recommended as an improvement on the ring and is indicated by the sign ∩.

Arm Rests. (Pads on Arms as illustrated below Fig. 6.) All Armchairs, Settees and Rockers can be fitted with these; for extra cost see price list.

Ornamental Tops (as illustrated below Fig. 7). Nearly all Chairs, Armchairs and Settees can be fitted with Ornamental or Fancy Tops. (For extra cost see price list.)

Turned Backs. Where Chairs etc. are illustrated with Turned Back Legs they are made out of one solid piece, contrary to the method usually adopted by other Manufacturers who make the turning in short lengths and join them together which weakens the Chair.

Engravings and Gildings. Any Chairs etc. can be supplied with sunk gold lines. (For extra cost see price list.)

Fitting Up. The Seat and Back of Chairs, Armchairs and Settees are fitted together in the following manner, unless specially ordered otherwise:

- a) When supplied fitted up and packed in straw; with 2 Coach Screws.
- b) When supplied dismounted (K.D.) for Export; with 2 bolts and nuts with polished heads. The Rings are secured by 4 ordinary wood screws, but in place of these 4 small bolts with nuts can be used if preferred (for extra cost see price list). Chairs etc. fitted in this manner are usually for Export and are referred to when ordering, as »with 6 bolts and nuts« (see illustration Fig. 8). — Where Chairs are used in a damp or hot climate the nuts should be tightened after being in use a short time.

Iron Tenons (as per illustration below Fig. 9), an improved method of strengthening the front legs with the seat, instead of wooden tenons. All our Chairs can be supplied with Iron Tenons at an extra cost (see price list).

Packing. The greatest care and attention is given to this department. Our goods can be supplied either mounted ready for use and packed in straw or dismounted (K.D.) and packed in cases or bales. In the latter way each piece is carefully marked and numbered so that skilled labour is not necessary to fit the Chairs together.

Measurements. All dimensions given in the Catalogue must be considered approximate — small deviations are unavoidable.

To avoid errors when ordering please state distinctly the article required, number and colour, also shape, pattern and kind of seat (wood or cane) In default of distinct indications we supply our goods according to the illustrations in our Catalogue.
